PROJECTS

1. ROLL THE DICE GAME

- Developed an interactive Dice Game web app using HTML, CSS, and JavaScript.
- Implemented random dice roll logic and dynamic winner display with real-time DOM manipulation.
- Designed a responsive UI with styled components and a refresh-based gameplay trigger.

2. RESUME BUILDER WEBSITE

- Designed and developed an advanced Resume Builder Web App using HTML, Tailwind CSS, and JavaScript with real-time preview, dynamic sections, and PDF export.
- Integrated Firebase for authentication and cloud storage, enabling users to securely save and retrieve their resumes.
- Delivered a sleek, responsive UI with animated gradients, optimized for both web and print formats.

3. PERSONAL PORTFOLIO

- Developed an interactive personal portfolio website showcasing skills, education, and contact information.
- Implemented dynamic features such as a typewriter effect, animated background gradient, parallax scrolling, and an interactive cursor trail to enhance user experience.
- Designed with a focus on accessibility and responsiveness, including a theme toggle for dark mode and print-friendly styling
